Training Loss Curves

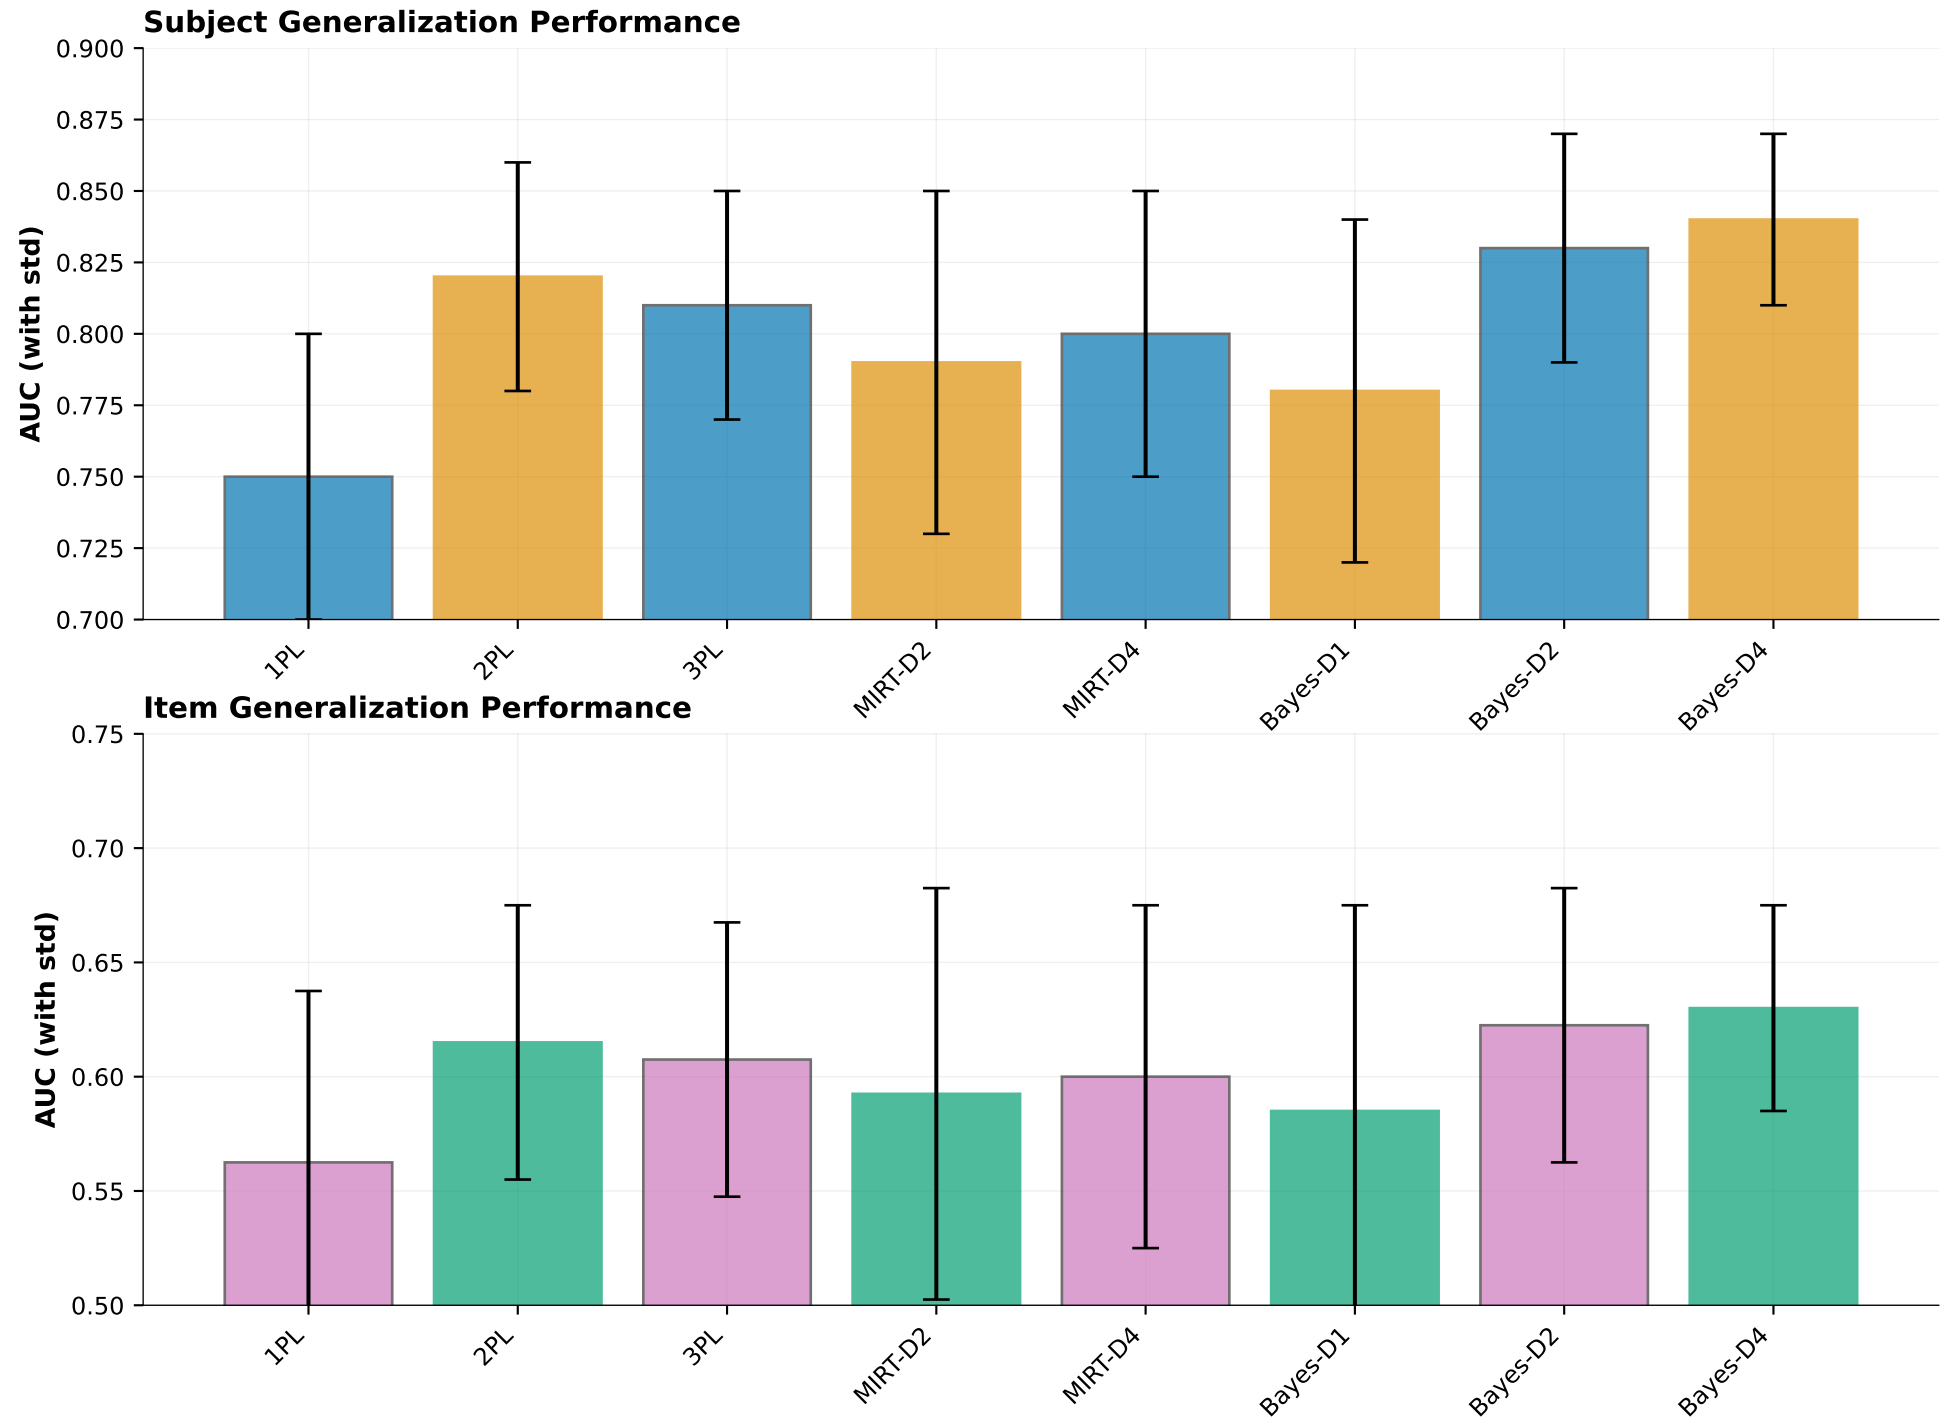

Convergence over 300 steps (3 seeds, n≥30 filtered data)

✓ Okabe-Ito colorblind-safe palette
✓ NeurIPS publication format
✓ 300 training steps
✓ 3 seeds shown (transparent overlay)

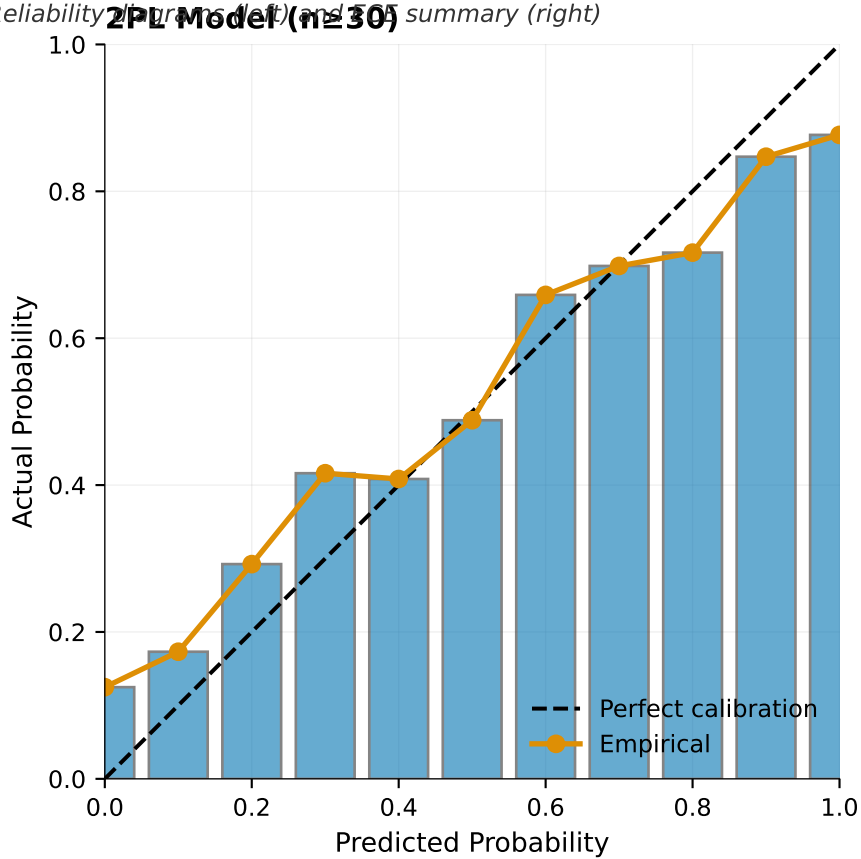

Offline Metrics by Model

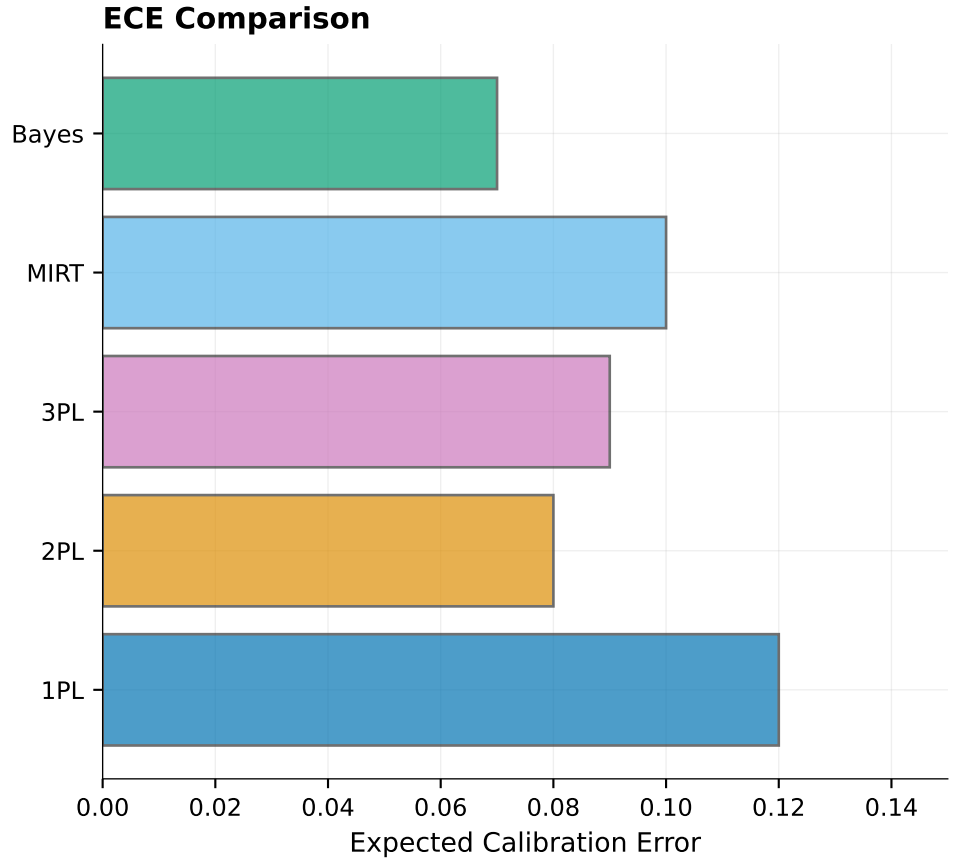

AUC, Brier, ECE aggregated across 7 benchmarks, 3 seeds

Calibration Analysis

Reliability diagrams (left) and ECE summary (right)

Lower is better. ECE measures difference between predicted and actual probabilities.
Reliability diagram (left) shows perfect calibration (dashed line) vs empirical (colored bars).
